

Bhawesh Bhaskar

Sr. Software Developer (Banking Expertise)

Project Visit: Malaysia

I am a competent full stack developer with more than 7 years of solid work experience in designing and developing websites for agency clients. I am a creative person who can produce websites from concept to launch. Having a detailed understanding of best UX principles and Backend Development along with the SEO best practice, my websites are optimized to load fast, be responsive and be a pleasure to use. I have worked effectively both independently and as part of a team, and I am capable of being highly productive either way.

WORK EXPERIENCE

Sr. Software Developer SMD Webtech Pvt. Ltd.

Dec. 2020 – Present

Responsibilities

USA-Based E-Wallet Website & Mobile Applications

- Collaborated with a cross-functional team of 5 developers to design and develop comprehensive e-wallet platforms.
- Developed and implemented core wallet functionalities including user registration, KYC verification, fund management (add funds, withdrawals), and peer-to-peer transactions (send, request, transfer).
- Integrated a subscription module enabling tier-based benefits and premium feature access based on selected subscription plans.
- Designed and implemented an Ambassador/Referral Program, allowing ambassadors to earn bonuses based on subscription package referrals.
- Integrated gift card purchasing and mobile top-up services to enhance user engagement and platform utility.
- Developed a virtual card module enabling users to generate and manage virtual cards for secure online transactions.
- Built a merchant module allowing businesses to accept payments via QR codes and NFC technology.
- Facilitated POS machine integration and assignment to merchants, ensuring seamless and secure in-store transactions.

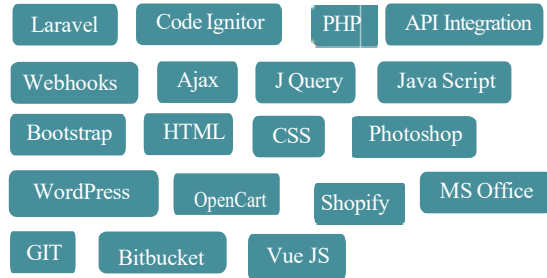

Portugal E-Wallet Platform – Web & Mobile Application Development

- Collaborated with a cross-functional team of 3 developers to design and develop a secure e-wallet platform for users in Portugal (web and mobile).
- Implemented core financial features including user registration, automated KYC verification, and wallet fund management (add funds, withdrawals).
- Developed peer-to-peer transaction functionalities such as money transfer, request, and send, improving transaction flexibility and user experience.
- Integrated value-added services including gift card purchases and mobile top-up, enhancing user engagement and platform utility.
- Designed and implemented virtual and physical card modules, enabling users to generate and manage secure cards for online and offline transactions.

Bonaire Government Project: Website and Mobile Apps Development

- Led a team of 5 developers in designing and delivering a government digital platform enabling citizens to remotely book and manage public services.
- Architected and implemented the IBP Card system to streamline service access across multiple government sectors.
- Designed and integrated end-to-end payment and billing infrastructure, including POS machines, QR code scanners, and thermal printers.
- Enabled seamless on-site and digital payment processing through secure POS and QR-based transactions.

— Full Stack Developer

CTD World

Aug. 2019 – Nov. 2020

Responsibilities

Job Portal Website

- Designed and developed a robust job portal website enabling employers to create accounts, verify credentials, and post job listings across various sectors.
- Implemented secure authentication and verification systems for both employers and job seekers, ensuring data integrity and confidentiality.
- Integrated payment gateways for premium services, providing additional options and features for both employers and job seekers.
- Developed intuitive user interfaces for job seekers to create profiles, manage applications, and apply for jobs seamlessly.
- Collaborated with cross-functional teams including designers and project managers to meet project milestones and client expectations.

Tosha Khana Ecommerce Website

- Developed and maintained an ecommerce platform specializing in ancient products, allowing sellers to list and manage a diverse range of items such as bottles, key rings, buttons, clocks and artifacts.
- Implemented secure user verification processes for registered users to ensure trust and authenticity in transactions.
- Integrated various payment gateways including PayPal and Stripe to facilitate secure online transactions.
- Collaborated with designers and stakeholders to optimize UI/UX design and enhance user engagement and satisfaction.
- Conducted performance testing and optimization to improve site speed, functionality, and overall user experience.

Furniture Ecommerce Website

- Led the development of a furniture ecommerce platform, enabling sellers to upload and manage their furniture products with ease.
- Implemented user authentication and verification processes to ensure secure transactions for registered users.
- Integrated Razorpay payment gateways to facilitate smooth and secure transactions.
- Developed responsive and user-friendly interfaces for browsing furniture products and completing purchases.
- Collaborated closely with designers and stakeholders to enhance UI/UX design and optimize user engagement.

Sweet Listing Website

- Developed a website for sweets sellers, enabling them to add various types of sweets with detailed pricing and descriptions to showcase their offerings effectively.
- Implemented a blog section where sellers could post articles related to sweets, benefits, recipes, and industry trends to engage and educate customers.
- Integrated content management systems (CMS) such as WordPress to facilitate easy updates and management of website content.
- Collaborated with designers and stakeholders to optimize UI/UX design and ensure a seamless user experience across devices.
- Conducted regular testing, debugging, and performance optimization to maintain website functionality and speed.

— Full Stack Developer

Annexorien Technologies Pvt. Ltd.

Sept. 2018 – July. 2019

Responsibilities

Listing Website

- Developed a comprehensive listing website where shop owners can register and list their shops, or opt for agent-assisted listing.
- Implemented location-based search functionality for customers to easily find specific types of shops in their area.
- Integrated paid membership options with special facilities for shop owners, enhancing their visibility and attracting more customers.
- Conducted regular testing, debugging, and performance optimization to maintain website functionality and user experience.

Concert Events Website

- Designed a website for booking artists and singers for concerts and events, focusing on intuitive user interfaces and seamless booking processes.
- Implemented secure communication channels for clients to inquire and book artists, ensuring confidentiality and reliability.
- Collaborated closely with clients to understand requirements and deliver tailored web solutions.
- Conducted usability testing and feedback sessions to continuously improve website performance and user experience.

CMS Websites

- Designed and developed multiple ecommerce websites on WordPress, OpenCart, and Shopify, tailored to client specifications and business needs. Customized and optimized themes and plugins to improve site performance, enhance user interface, and streamline checkout processes.
- Integrated various payment gateways including PayPal, Stripe, and others to facilitate secure online transactions. Collaborated closely with designers, project managers, and clients to ensure alignment with project goals and timelines.
- Provided ongoing maintenance, support, and troubleshooting for ecommerce websites to ensure smooth operation.
